Application/Control Number: 10/009,321

Art Unit: 2821

# **DETAILED ACTION**

Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification and the claims.

#### **Drawings**

- 1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
- 2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s): "figs. 6 (a-d), 10 (a-d), 14 (a-d), 15 (a-d), 17 (a-d), 18 (a-d), 21 (a-b), 22 (a-f)" not mentioned under the "BRIEF DESCRIPTION OF THE DRAWINGS. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Art Unit: 2821

### Specification

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do include the following reference sign(s): "Figs. 1 (a-b), 2 (a-b)" mentioned in the description (see page 6), but do not shown in the drawings.

## Claim Rejections - 35 USC § 112

4. Claim 22 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 22, line 29, the language, "the two helical antennas" lacks a proper antecedent basis.

#### Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Benge et al (4,843,404).

Application/Control Number: 10/009,321

Art Unit: 2821

Benge et al in figure 3 disclose a helical antenna manufacturing apparatus comprising a first roller printing a conductive and viscous paste on a surface of the core to form a helical line, a roller driver rotating the first roller, a core driver rotating the core and moving the same in a longitudinal direction and a controller controlling the roller driver and the core driver to control an rpm of the core, a longitudinal moving speed of the core, and the rpm of the roller, the longitudinal moving speed being set according to working frequency bands of the antenna.

7. Claims 8, 16, 18 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Auriol (5,134,422).

Auriol in figures 2-5 discloses a helical antenna comprising a core made insulative material and having a conductive helical line printed on a surface of the core and a feeder formed on a lower part of the core and electrically connected with an external circuit.

#### **Conclusion**

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patents to Foldes, Rudisill, Hofer et al, Terret et al, Zandbergen, Sydor, Burton et al and Drewett are cited as of interest and illustrate a similar structure to a helical antenna assembly.
